## Global Records™

A Comprehensive, Real-time Records Management System for the Secure Community

**Global Records™** is a complete, user-friendly, cost-effective records management system for public safety agencies. Running in a Windows™ NT SQL Server environment, Global Records efficiently and effectively provides accurate, real-time information sharing to the Front Line. Providing officer safety is directly related to delivering accurate information when they need it.

**Comprehensive, real-time reporting.** Global Records offers more than 100 pre-defined system reports and user-defined custom reports to fulfill each agency's unique requirements. Through seamless mobile integration with Global mReach™, patrol officers and agencies can connect with real-time, in-field reporting.

### Global Records advanced features and capabilities include:
